Dear Robert:

Relative to our telephone conversation on 9-23-91, I can appreciate the time involved in reviewing the acreage associated with the different permit numbers. If I understand the allocation, each permit is not to be duplicated and the numbers that you and Norseth came up with are correct ie: up to April 18th 1966 the total allocation for West Beaver is 49.50 cfs. Also noted on the priority listing is an allocation of 8cfs with a 1967 date.

I have two additional requests. 1. Fallan creek, which is a tributary to West Beaver, has been diverted via a large ditch. I would like a Priority listing for that creek. 2. Burnt Fork Drainage seems to have some discrepancies and I request a priority listing for this drainage also. You mentioned that John Yarbrough has the books and access to this information. He and myself tried to go through and do that but was unable to decipher Utah's water rights. Your help in putting together this priority listing would be most helpful.

Yours,

Kenneth E. Hanks
